# Two Door Tunnel Inlet

## Durable PVC Doors -

Lightweight rigid PVC doors allow for easy installation and can be operated with a curtain machine.

**Energy Savings** - Will lower your energy cost with 9 times the insulation value of conventional curtain material.

**Galvanized Steel Brackets** - Galvanized steel brackets have a bottom angle that makes installation a breeze.

**Tight Seal** - Static pressure pulls double stitched nylon curtain up against tunnel door to create an air tight seal.

**H-Channel & C-Channel** - PVC H-Channel & C-Channel slide onto the PVC panels for proper seal.

**Low Maintenance** - Less maintenance than conventional curtain closures.

**Dead Zone** - Eliminate those dead zone areas created by curtain sidewalls & curtain pockets.

Spring tension bracket helps maintain proper seal when doors are closed.

Bracket angle aligns with bottom of panels for easy installation.

Bolted galvanized steel barrel hinge, will provide superior operation of doors for years of dependability.
