

VENTILATION SYSTEMS

OUTSIDE TUNNEL DOOR

Ventilate and Insulate

Outside tunnel doors are available for systems of any length with any number of vertical doors. Drive units can control single, double, or triple doors. A unique overlapping door design minimizes framing. Other features include 1.5" panels with R8 insulation rating and built-in UV protection. Choose white or black door panels.*

VENTILATION SYSTEMS
INSIDE TUNNEL DOOR

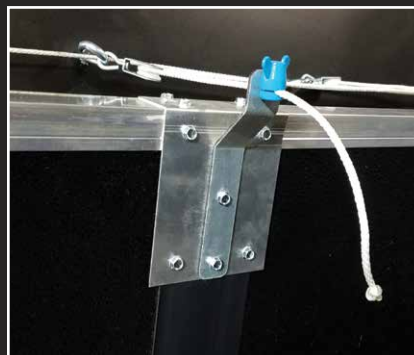

Low Maintenance, Energy Efficient

Tunnel doors help eliminate dead zone areas created by curtain sidewalls and curtain pockets. Cumberland's Inside Tunnel Door system comes fully assembled and is constructed using a rigid, ultra lightweight, laminate foam panel for easy installation. Choose white or black door panels in 2', 3', 4', 5', and 6' heights.

Ratchet bracket option

Tension bar option

T-Bracing at panel connection points adds rigidity
