AA128 – Software Update Version 4.6.6

CORRECTIONS & FIXES

System

Test call & callback

- The test call can now be acknowledged by calling the Agri-Alert 128 back.
- When a user calls back Agri-Alert 128, the test report identifies the alarm responder based on the last phone number dialed by the system in the contact list.
- The monitoring of the phone line is now enabled by default for new configurations.
